

NMS:

- 1) Make a new Paper Gradle plugin
- 2) Wait like 10-20 seconds
- 3) Run gradle wrapper in terminal in IDE to install. like latest version

Change plugins to include this;

```
id 'java'
id("io.papermc.paperweight.userdev") version "2.0.0-beta.19"
id("xyz.jpenilla.run-paper") version "2.3.1"
```

Depednacies look like:

```
dependencies {
    compileOnly("io.papermc.paper:paper-api:1.21.10-R0.1-SNAPSHOT")
    paperweight.paperDevBundle("1.21.10-R0.1-SNAPSHOT")
}
```

Reload gradle

File -> Close Project

Reopen project and you have NMS.

- MAY need to go File → Invalidate cache → Restart

It seems you compile by typing in

`./gradlew build`

Then build -> libs -> and its there.
